

Royal Society of Chemistry, Theoretical Chemistry Group

25th Anniversary Graduate Student Meeting

Wednesday 13th April, 2005

School of Chemistry, University of Nottingham

This year marks the 25th anniversary of the first graduate student meeting organised by the Theoretical Chemistry Group. To celebrate this occasion, in addition to the talks by final year postgraduate students in theoretical/computational chemistry, we will be having a poster session for second year postgraduate students and there will be plenary lectures by three of the speakers from the first TCG graduate student meeting in 1980: Professor Patrick Fowler (Exeter); Professor Sally Price (UCL); and Professor Jonathan Tennyson (UCL).

Participants should arrive at 10:30 am, in room C17 of the School of Chemistry, University of Nottingham, in time for a prompt start at 11 am. The meeting will end at 6:15 pm. The poster session will be held over lunch, at which time it will also be possible to tour the newly installed SUN high performance computing facility at the University of Nottingham.

Although we now have sufficient offers of talks, posters are welcomed from penultimate year postgraduates. Poster titles and abstracts should be submitted to the Secretary of the Group, Dr Roy Johnston (r.l.johnston@bham.ac.uk) by Friday 18th March. Thanks to the generous support of Sun Microsystems Ltd, there are no registration fees, but potential participants are requested to email Roy Johnston by Thursday 24th March, to give us an idea of likely numbers.

Further details are available on the Group website:
